Important Reminders (use this *HELP-PCO Child Summary* in conjunction with the 4-page HELP-PCO Instructions):

1. The 9 mandated Indicators appear in bold, but all 100 Indicators are shown so you can consider the needs of the whole child and family.
2. Each child progresses at his/her own rate and not every area of HELP or the PCO Domains applies to a child at any one time.
3. Use HELP for everyday ongoing planning to individualize a child's instruction; update his/her PCO progress on this Child Summary only periodically; this helps you teach to the HELP skills, not the Indicators.
4. To help with parent involvement or to inform parents what Indicator you might be working on with the child, hand out pages from *HELP for Preschoolers Activities at Home* based on the HELP skills you are targeting, and use the Cross-Reference Index (Instructions) to find the Indicator for that skill number.
5. A child does not necessarily need to master all the HELP skills listed for an Indicator to show Indicator achievement. Always use your informed professional judgement in making the final determination regarding PCO Indicator achievement.
